Advanced Operating Systems

#11

Shinpei Kato
Associate Professor

Department of Computer Science
Graduate School of Information Science and Technology
The University of Tokyo

Report

- Read the following paper
 - “Corey: An Operating System for Many Cores”
 - Boyd-Wickizer, et. al.
 - 8th USENIX Symposium on Operating Systems Design and Implementation (OSDI’08)
- Summarize the following points (1000 ~ 1500 words)
 - How is Corey different from Barrelfish?
 - What is the main solution of Corey for many cores?
 - What is improved by Corey and how much?

Report

- Submit via e-mail to:
 - report-os@pf.is.s.u-tokyo.ac.jp
 - The title of the e-mail must follow:
 - “Advanced OS Report [YOUR STUDENT ID]”
- The submission of the report is due on:
 - January 16th, 2018, 23:59PM
