Advanced Operating Systems

#4

Shinpei Kato
Associate Professor

Department of Computer Science
Graduate School of Information Science and Technology
The University of Tokyo

Report

- Fork a child process and get its VMA from the parent
 - Use sample code in the 8th page of the slides
 - Add code to the parent process space that prints out the VMA information of the child process
- Confirm the result of the code
 - You can copy & paste the console output
- Better to attach the source code together

Report

- Submit via e-mail to:
 - report-os@pf.is.s.u-tokyo.ac.jp
 - The title of the e-mail must follow:
 - “Advanced OS Report #4 [YOUR STUDENT ID]”
- The submission of the report is due on:
 - November 8th, 2018, 23:59PM
